Academic Honesty

I take cheating extremely seriously. Just because we are learning virtually and remotely does not mean that you can cheat. If you do not know the answer, it is better to try your best or leave it blank. It is very tempting to cheat, since the computer is right in front of you. Do not give in! people who cheat exploit the good faith of those who don't, because the cheating lets them represent themselves better than they are (especially if there is a curve). If you know of someone in the class who is cheating, it is your responsibility to inform me. Academic Dishonesty is handled according to college catalog and could lead to suspension. You are allowed to collaborate and use resources to help you with the WebAssign Homework.

Homework: All of the homework will be done online. Once you have your WebAssign access code, go to www.webassign.net, log-inn and register, and enter the class code:
